Subject: Conversation with Kwok, Rose

Flannery, Erin [10:32 AM]:

Hey Rose! Do you have the Climax Mine's NPDES permit in your G drive? For some reason it is proving difficult to find via our systems. and I know it was renewed in April 2013, but of course it's *just* old enough for CO to have already taken it off of the public notice section of their website

Kwok, Rose [12:15 PM]:

Hmm, I may only have the older one
let me check

Looks like we only have the 2004 permit on the G drive

We might ask the Region for the 2013 permit - weird that it's already down from the website

Flannery, Erin [1:10 PM]:

Thanks! I will see about getting the new permit. Could you send me the 2004 permit if you get the chance? There often aren't enormous changes between permits, so it could still have good info
